

## PDF Converter *product details*

Plutext's high fidelity PDF Converter is a standalone product, for converting doc/docx files to PDF.

It uses its own layout engine, designed to closely mimic Word's. Our software:

- aims to mimic Word's layout (high fidelity)
- produces PDF/A-2b compliant output suitable for long term archival
- is simple to install (especially compared to SharePoint, LibreOffice etc)
- is fast (and multithreaded)
- is frugal with resources
- is secure (strict separation of conversion jobs; so no information from one document can accidentally end up in another document)
- runs as an operating system service.

### **Your Server**

The PDF Converter is easy to install on-premise as a (sandboxed) Windows or Linux service.

Unlike the various public web based PDF conversion services, our offering is designed to give you the privacy/security, performance and control which only an inhouse service can provide. No external service is used or needed, so no information leaks from your systems.

We support the following platforms:

- Windows
- Linux (most flavors)
- Solaris (on both Sparc and Intel)
- Docker

### **Web Scale**

The service exposes a simple REST-based interface and can be accessed from any programming language, including Java, PHP, Python, C#, C/C++.

If necessary to meet your throughput requirements, you can scale it by running it on multiple servers behind a load balancer.

To facilitate that, we've avoided per CPU and per server licensing. Instead, it is priced on a pages/month basis.

## Evaluation

Our cloud based eval server is at:

<http://converter-eval.plutext.com/>

To see whether our rendering fidelity meets your needs, you can use your web browser to upload a doc or docx file, and get a PDF in return.

## Pricing

### Scenario 1: subscription capacity pricing; not for redistribution

The price is a price per annum, for installation on servers housed at a single location/data centre (but accessible from anywhere).

You can deploy on as many servers as required to meet your throughput requirements.

Edition	Capacity Limitation	Annual Subscription (per site)	
		€	\$
Light 1	Up to 4k pages/month	€439	\$495
Light 2	Up to 10k pages/month	€795	\$895
Medium 1	Up to 50k pages/month	€1465	\$1650
Medium 2	Up to 100k pages/month	€1950	\$2195
Heavy 1	Up to 200k pages/month	€2665	\$2995
Heavy 2	Up to 400k pages/month	€3555	\$3995

- pay in your preferred currency (€ or USD); prices exclude local taxes, if any
- Not enough capacity? You can upgrade to another band at any time for the difference between what you paid and our current price (pro rata, rounded up to nearest quarter)

Multi-year special offers:

- Get **3 years** use if you pay for 2 years in advance
- Get a **perpetual license** if you pay for 3 years in advance.

### Scenario 1: unlimited editions; not for redistribution

The price is a price per annum, for installation on servers housed at a single location/data centre (but accessible from anywhere).

Edition	Capacity Limitation	Annual subscription (per site)	
		€	\$
Unlimited	No limit on capacity	€4,990	\$5,690

Multi-year offers: see above.

### Scenario 2: binary redistribution in your product; no SAAS

The price is for the right to redistribute binaries in your product for 3 years; the redistributed binary will never expire.

Edition	Capacity Limitation	Three year price	
Unlimited	No limit on capacity	€8,990	\$9,490

### Scenario 3: Bundle: unlimited SAAS + binary redistribution in your product, for 3 years:

Unlimited	No limit on capacity	please enquire
-----------	----------------------	----------------

## Maintenance/Support

All prices include free updates for the duration of your subscription.

Included support is based on hours of effort addressing your support requests; hours included are as follows:

Edition	Hours per year
Light 1	0 (updates only)
Light 2	2
Medium 1	4
Medium 2	6
Heavy 1	8
Heavy 2	10
Scenario 1 Unlimited	30
Scenario 2	30
Scenario 3	40

## Order/Purchase Process

When you have completed your evaluation and are ready to order:

- please send an email to [sales@plutext.com](mailto:sales@plutext.com) saying what you would like to order
- we will send you an invoice in return
- our invoice describes the payment methods we can process, namely:
  - credit card
  - PayPal
  - bank transfer (allow 5 days)
- on receipt of payment, we will email you a license key
